Jamhuriya University of Science & Technology

Faculty of Computer & IT

Course Title: PHP & MySQL

Activity: Chapter 4 Assignment (Forms)

Due date: October 18, 2026

1) Create a form which allows the user to collect for student information, The form needs to contain these sections such as Personal Information, Parent Information, Academic Information.
    - Personal Information needs to include at least Name, POB, DOB, Address, Gender, Telephone, Email, Image.
    - Parent Information needs to include at least Name, Telephone, Relationship.
    - Academic Information needs to include at least ID, Faculty, Department, Class, Registration Date.
2) When the register button is clicked, you need to validate the form has entries in each of the fields. If the form is missing an entry in the field, you need to tell the user what needs to be entered and put the user at that point on the form.
3) Ensure that the name field is not empty and contains only letters and spaces, Validate the email field for a valid email format and also Check if a file is uploaded and restrict the file type to image formats (e.g., .png, .jpg, .jpeg, .gif, etc.).
4) Once the form is completed successfully, you need to redirect to separate page with the contents of the form and you need to display the information back to the user which is being submitted as tabular form.
5) Use Bootstrap or Code snippets to style your form and table as much as possible.

Submission Instructions: Upload your work as a zip file to the submission portal.
